

GPF Advisory Council presents:

Cocktails and Conversations

Join us for an online speaker series with local experts about important Pond management topics. You supply the cocktails; we supply the conversation! Presentations will be 20 minutes long followed by a question and answer session.

Nitrogen: Too Much of a Good Thing

August 13, 5:30 PM

Emily Reddington – Executive Director, GPF

Nitrogen is an essential building block of life, but in excess it can harm coastal ponds. Learn how to reduce your impact (septic & fertilizer runoff) and support Pond health.

Transforming Nitrogen in Your Own Backyard

August 20, 5:30 PM

John Smith – President, KleanTu Wastewater Treatment

Learn how your existing septic system could be augmented to reduce its nitrogen output. John will discuss a system which is approved for use on Martha's Vineyard.

Green Practices for Greenscapes

August 27, 5:30 PM

Kevin Banks – Superintendent, Vineyard Golf Course (VGC)

Learn how to green your yard while still being gentle on the environment. The VGC, a Great Pond neighbor, is an international leader in organic golf course management.
